# CHCS II Training

CHCS II Training Status as of: **21 Jun 05**

# Automatic Call Distribution (ACD) Situation Overview

- Existing ACD designed to support BAMC
  - Does not support large scale, high volume, multi dimensional call center
  - Identified shortfalls
    - Limited real time call performance data
    - Retrospective management information
      - Callers in cue, time between calls, specific agent data, call handling time, etc.
      - Limited forecasting ability
    - No real time cue reassignment
    - Limited voice prompt update
- New and changing requirements definition
  - Expectation of patient service?
  - Can the expectation be met across the market?
  - Can expectation adapt to changing market and facility needs?

# Call Distribution Update

- Funding obligated \$550K, BAMC \$224K and WHMC \$336K
- SOW complete and contract ready for award - working with CAMO on specifications and procurement through Army program manager located FT Monmouth
- Implementation starts early August
- Go live date early September - Date slip from late July due to finalizing SOW and equipment manufacturing
- User training over long Labor Day weekend
- Annual maintenance \$108K begins September 2006
- New system will support - 200 agents (includes all facility requirements), 6000 maximum call volume per day, Contingency backup and 5 years maintenance support
- BRAC impact review - Project fully supports current mission and personnel/equipment alignment for future, project exercises joint decision making and execution, equipment will be at the end of its 5 year life cycle at BRAC implementation, dedicated telephone switch for North Campus and life cycle replacement cost for ACD projected in BRAC

# FOCUS: Life Cycle Integration
